Bronze Transitions students have worked very diligently throughout the semester to submit their proposals to transition into silver and take college courses. The final stage of the proposal process is to give a presentation on the skill sets developed over the course of the semester that will enable them to succeed in college. The skills students focused on in their presentations were: Academic Preparation, Communication, Responsibility, Follow Through, and Attendance. Students also had to showcase their developed and organized portfolios that provided evidences of the skills developed. Each and every one of the students did a FABULOUS job with their presentations. Their dedication and hard work towards their education really made their advisor, Mrs. Funk, proud! WAY TO GO!
